

EDUARD SEKAN

Front-End Developer & Entry-Level Backend

Telegram: [@EEddy25](#)
GitHub: [github.com/Eddy-hub19](#)
Portfolio: [eddy-hub19.github.io](#)

PROFILE

Dedicated Front-End Developer with 4+ years of hands-on experience focused primarily on building modern, responsive UI applications using React, Next.js, and TypeScript.

Has basic practical exposure to backend engineering (NestJS, Node.js, PostgreSQL). While primary expertise lies firmly in front-end development, possesses fundamental understanding of API integration, database schemas, and server-side setup to effectively collaborate with full-stack teams.

TECH STACK

Frontend (Primary): Next.js, React, TypeScript, JavaScript, SCSS, Tailwind CSS, Framer Motion, React Query, PWA

Backend & DB (Basic / Foundational): NestJS, Node.js, REST API, PostgreSQL, Prisma, Supabase, Neon, Cloudinary

DevOps & Tools: Git, Docker, Vercel, Railway, Webpack / Vite

TOP FEATURED PROJECTS

1. NGO "Territory of Good" — Non-Profit Public Platform WordPress • PHP • Custom CSS/SCSS • JavaScript • MySQL • HTML5 - Engineered a complex non-profit web platform with multi-section content, donation workflows, and media integration. - Developed custom responsive layouts, optimized asset loading, and tailored CMS configurations for scalable content management. - Ensured cross-browser compatibility, high performance, and an intuitive user interface for public accessibility.	Live Demo ↗
2. Future for Kids — Social & Educational Platform Next.js • React • TypeScript • SCSS / Tailwind CSS • Vercel - Developed a responsive, production-grade web platform focused on modern UI/UX and accessibility. - Optimized client-side rendering performance, Core Web Vitals, and responsive layouts across viewports. - Integrated modular component architecture with TypeScript to ensure a clean, maintainable codebase.	Live Demo ↗
3. Podillya Majster — Commercial Business Platform JavaScript • WordPress • PHP • SCSS • HTML5 - Engineered a custom commercial website optimized for fast page loads and smooth user experience. - Customized dynamic content flows, responsive layout grids, and interactive contact systems. - Achieved pixel-perfect design accuracy with a mobile-first UI approach.	Live Demo ↗

EXPERIENCE & TRAINING

Junior Front-End Developer (4+ years practice)

- Shipped 10+ production/commercial web apps with strong UI focus.
- Implemented frontend architecture, custom UI components, state management & API integrations.

Internship & Education

- Completed E-logic Internship (Docker, PHP, teamwork practices).
- Finished full-stack bootcamps across GoIT, Hexlet, and Okten School.
