Russian: Native

PROFILE

Full-stack developer focused on creating premium digital experiences with a "Quiet Luxury" aesthetic. Passionate about interactive UI, 3D web graphics, and building scalable real-time applications.

KEY PROJECTS

Christ App

Next.js, Socket.io, PostgreSQL

A specialized messenger platform designed for spiritual engagement. Features real-time chat, Bible integration, and collaborative tools for community interaction.

Neskai

Next.js, epub.js, PostgreSQL

A collaborative reading platform (PWA) allowing users to read various books together. Implements shared reading states, notes, and real-time discussion features.

Future for Kids

Next.js, Vercel Deployment

future-for-kids.vercel.app

Web platform focused on educational and social solutions for children, emphasizing a modern and accessible UI/UX.

EXPERIENCE

Junior Full-stack Developer

4+ years of self-driven practice and development

Developing high-quality web applications, managing deployment pipelines (Docker, Railway), and mastering interactive frontend technologies like Three.js.
